for the Professional Pilot:
Excruciatingly Detailed
PLAIN ENGLISH Explanations
of EVERYTHING Essential for
EVERY Pilot
By Richie Lengel

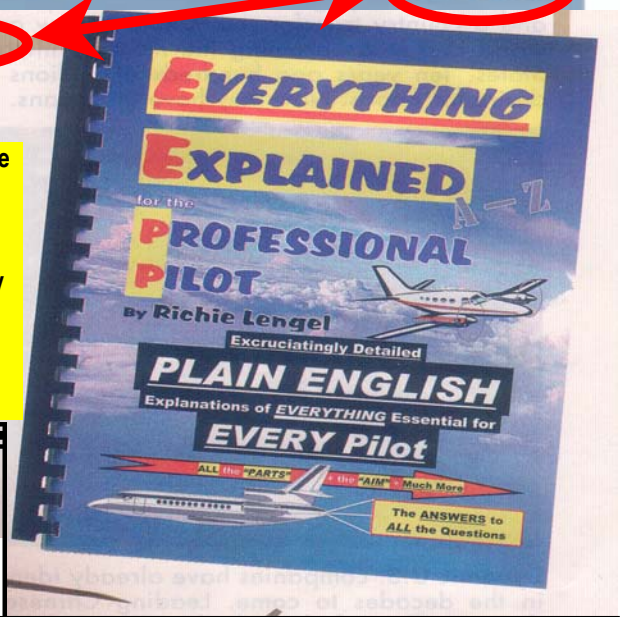

According to the author, the purpose of this book is to replace that hodgepodge of impossible-to-find information spread out throughout that library of books most pilots have

— put ALL that information in ONE PLACE — explain it in PLAIN ENGLISH, but in excruciating detail — supply ALL the REFERENCES, so you can look it up yourself if you need further guidance — make it extremely easy to read by using bold, underlined and HIGHLIGHTED TEXT that EMPHASIZES the important words — sprinkle in a little sarcastic humor and cheesy clipart — and supply the most complete INDEX ever created, with all subjects listed by EVERY possible keyword that could possibly come to mind... even if it's a slang term. In other words, make it effortless to look up anything... instantly!

NEW BOOK EXPLAINS IT ALL:

People aspiring to become professional pilots—and even those who already are—will find Richie Lengel's *Everything Explained for the Professional Pilot* to be a handy resource. It addresses in an outline style the flight-related subjects of airspace, airport operations, navigation, communication, weather, flight rules, and approach procedures with liberal references to the FARs, the AIM, and other sources.

Lengel is an 11,000-hour airline transport pilot with type ratings in the Falcon 20 jet and Douglas DC-3 — he devotes considerable space to explanations of professional pilot issues. Pilot certification, logbooks, and medical issues rate their own chapter. Two chapters are dedicated to commercial operations, covering flight time and duty, operations specifications, load manifests, second-in-command requirements, cargo floor limits, initial operating experience, and the provisions of the Pilot Record Improvement Act. The book closes with a convenient and extensive compilation of conversions, formulas, rules of thumb and a very comprehensive index. Bold underlined text emphasizes the key words and important points. Price: \$59.95.
